supratentorial medicine

November 14, 2012

- Very highly recommended
- Needed tools for every family physician
- I would recommend it highly to my family medicine colleagues
- What I learned was much more relevant and applicable in primary care than what I learned in university
- Practical, efficient, interesting
- Very practical for primary care psychiatry... fills a gap.
- I highly recommend this workshop for family practice.
- Practical and relevant to family medicine
- Excellent presentation style; kept my attention the whole time!... simplified a very complicated subject... highly recommended
- I learned a lot more primary care psychiatry than in my postgraduate training
- Practical... engaging teaching style
- Excellent presentation... learned enough to start using CBT in family practice
- Very highly recommended

What family physicians say (continued) ...

“

Very practical for primary care psychiatry... fills a gap. I highly recommend this workshop for family practice.

— Elizabeth Masarelli, MD

supratentorial medicine

November 15, 2012

- Bite-sized interventions... highly relevant, both for clinical practice and personal insight!
- 10/10 recommended
- Constant application to primary care and what works... I learned a ton... fantastic... highly recommended!
- Excellent... very entertaining... warm & skilled presenters... absolutely and enthusiastically recommended
- Practical tools applicable to daily practice... very highly recommended In-depth with practical tools/ approach for family medicine practice... will definitely be applying to my practice... highly recommended.
- Extraordinarily practical... very highly recommended
- Very good, very useful... very helpful... very much would recommend to others
- Recommended highly
- Simple & applicable... learned tons more primary care psychiatry than in my postgraduate training... excellent... very highly recommended
- Practical tools... excellent material applicable to primary care! ... I think every family medicine resident should have this training
- Warm, humorous, and to-the-point
- Very highly recommended

## What family physicians say (continued) ...

- Outstanding... I learned much more primary care psychiatry than in my postgraduate training... very helpful and practical... exceeded my expectations... very highly recommended
- I learned a lot & it is all useful... very highly recommended
- I liked all of it -- organization, presentations, answering of questions, exercises, etc... no clue how it could be made better... extremely highly recommended!
- Practical tools to take into daily practice
- Very relevant to primary care, which was appreciated... very highly recommended
- Well-organized and relevant... applicable not just to psychiatric counseling but in various medical scenarios (chronic pain, motivating diabetics, etc)... very highly recommended.
